

e-Commerce Website

According to some projections, e-commerce sales account for \$1 of every \$10 spent on discretionary purchases in the United States.

We can add a "webstore/shopping cart" to a new or existing website so cheaply that 1-2 customers per year will pay for this added capability.

What you gain is effectively you have an open store, 24 hours by 7 days per week, including holidays.

Can add a shopping cart capability to most websites for as little as \$100

We Understand This Technology

Inexpensive Websites

\$50 Websites

Will develop a 5 page site for \$50, if you have domain name & host.

Our Simple Websites are very inexpensive! We can implement a 5-10 page website (domain name, host and construct) for less than \$200 for 1st year and our current fees for the 2nd+ years are \$100 per year.

No 2nd year fee if you host yourself!

If desired we can even split this payment into two equal payments. You can terminate our agreement at any point without any penalty.

Our Results Are Pure Gold

Local Search Results?

Traditional Telephone yellow pages are no longer the place to search for a local business phone number or address.

Good Local search results from internet searches are critical for America's small local businesses.

Currently about **50% of the searches for a local service or product are selected from local sources** such as Google Places and "Yellow pages" sites, such as Superpages and Yellowbot.

Is your website on the 1st page results?

We Understand This Technology

Mobile Device Support?

Is your website mobile device (phone, Ipad, etc) compatible?

Many websites were not designed for small screen displays.

This year it is expected that more than 50% of all internet searches will be done on cell phones and tablets.

We can easily make old websites mobile compatible.
